

CLIMATE ACTION SUMMIT 2026

ONESTL

ACCELERATING CLIMATE ACTION TOGETHER

January 29-30, 2026

Washington University in St. Louis - Eric P. Newman Education Center
onestlclimatesummit.com

As a region, we are building a strong foundation for climate action: a collectively developed regional Climate Action Plan, a City of St. Louis Sustainability & Climate Plan, and numerous initiatives dedicated to making St. Louis a more sustainable, equitable, and resilient place to live and work.

This summit seeks to move these frameworks forward by engaging local governments, businesses, and community-based organizations in strategies for a sustainable and equitable future. With your support, we can bring key stakeholders together. This summit is anticipated to be a one-time event, but will bolster ongoing collaborative initiatives that will continue after the summit to implement the Regional Climate Action Plan. These include the OneSTL Working Groups, Cool Cities STL: Elected Leaders for Climate Action, and many other local initiatives.

Your support with sponsorships will make the summit as affordable as possible and free for representatives from low-income or disadvantaged communities.

Three Audience-Focused Tracks

- **Government** – Leaders and officials focused on policy and implementation.
- **Business** – Companies aiming to align operations with climate goals.
- **Community-Based Organizations** – Grassroots leaders and advocates.
- Environmental justice will be woven into the tracks as an integrated theme.

Summit Highlights

- **Engage and Connect** – Build partnerships across sectors to drive impact.
- **Learn from Experts** – Hear from leading sustainability voices.
- **Collaborative Working Sessions** – Develop actionable strategies tailored to you.

Outcomes

- Strategies for planners, government officials, businesses, and advocates to align efforts with the Regional Climate Action Plan.
- Practical strategies for businesses to implement the plan and showcase their progress.
